DETAILED ACTION

Specification

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

The abstract of the disclosure is objected to because it should be carefully reviewed and edited for proper idiomatic English. Correction is required. See MPEP § 608.01(b).

Drawings

If appropriate, Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

It seems as if Figure 5 is prior art, however if this is not the case, Applicant need not to submit corrected drawings.

Claim Objections

Claims 1 and 2 are objected to because of the following informalities:

In claim 1 line 1, "a" should be inserted before "corrugated".

In claim 1 line 2, "an" should be inserted before "inner".

In claim 1 line 17, "at a" should be inserted before "minimum".

In claim 2 line 1, "a" should be inserted before "corrugated".

In claim 2 line 4, "at a" should be inserted before "minimum".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 5, the use of "and/or" renders the claim indefinite.

In claim 1 lines 10-17, it seems as if the term "opposite" is being used incorrectly, and thus the limitations presented are unclear. For instance, how can something be "most opposite". Perhaps "distal" should be used in place of "opposite" at least in some of the instances.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Note that the allowability of claims 1 and 2 is also contingent on addressing the above noted objections to claims 1 and 2. See ***Claim Objections*** above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
